

SPACE ENTERPRISE CONSORTIUM LETTER OF INTEREST

The United States Air Force Space and Missiles Systems Center (AFSMC) in El Segundo, California, has made an explicit call for a consortium and lead organization to focus on Research & Development, Testing & Evaluation for space vehicles, payloads, launch capabilities and associated ground segments. The work will be funded through the use of Other Transaction Authority (OTA) for prototype projects for acquisition. The OTA encourages companies with expertise within the space industry to participate in the consortium.

The Los Angeles County Economic Development Corporation (LAEDC) has submitted a letter of intent in response to the initial RFI to lead as Consortium Agent. It will be headquartered in Southern California, but available to companies within the space industry nationwide. In order to exhibit the consortium's strength of talent and resources, interested companies are encouraged to show their support by submitting a letter of interest to join this proposed consortium.

Please accept this signed document as our company's formal letter of interest in collaborating with the proposed Space Enterprise Consortium in Southern California. We believe that the benefits of this collaboration has the potential to significantly increase jobs and investment within the industry across the country. We look forward to discussing how we might both benefit from this collaboration.
