### ABOUT THE PROGRAM

#### HARD SKILLS

The program provides a foundation of valuable, quantifiable, manufacturing skills and abilities. A series of classes rotate between ELAC and UCLA. Each week's instruction focuses on a different industry-informed skillset, providing a fundamental understanding of the manufacturing industry as a whole. Skillsets include:

- Manufacturing Processes
- Computer Aided Drafting & Design
- Print Reading
- Applied Math for Manufacturing
- Project Based Learning & Presentation

#### SOFT SKILLS

In order to have a well-rounded employee who integrates well within your company, the individual needs to also possess basic "soft skills." The program goes beyond basic, measurable skills, to also include training in interpersonal behavior for the professional environment, such as:

- Time Management and Work Ethic
- Written and Verbal Communication
- Teamwork and Leadership
- Business Acumen for Employees
- Professional Etiquette
